

## **School of Missionary Aviation Technology**

### **Immunization Policy**

All students enrolling in SMAT are asked to complete an immunization form reporting their immunization status. Students are encouraged, but not required to have had all childhood immunizations required by schools in the U.S. such as measles, mumps, rubella (MMR), polio and the tetanus series. These recommendations are consistent with the recommendations of the Centers for Disease Control and Prevention.

All international students are required to show evidence of a Mantoux skin test for tuberculosis within the past year and if positive, a chest x-ray prior to enrolling in the school. This TB test can be obtained at a minimal fee at a local health clinic.

### **Medical Insurance**

All students are required to secure insurance coverage for accident and health/sickness. Proof of health insurance must be submitted to the Admissions Office at the time of enrollment.

International students are required to be covered by a recommended Student Health Insurance Plan unless proof of equivalent insurance can be submitted.
